

WinGAP ABOS Module

The ABOS module has been revised to provide more efficiency in the assignment of values to boats and motors when using the Market Approach. The Boat/Motor screen is accessed in the same manner as before, i.e., pressing the Add or Edit button to the right of the Boat value field.

The revised **WinGAP – Boats & Motors** screen appears much the same as before with the exception of the re-location of the **ABOS – Boat** and **ABOS – Motor** buttons. As shown below, these two buttons have been moved to the upper left corner of the screen for easier access.

The screenshot shows the 'WinGAP - Boats & Motors' window. At the top, there is a dropdown menu for 'Boats & Motors' showing 'Boat : Glassmaster - 1992 16' 4\".

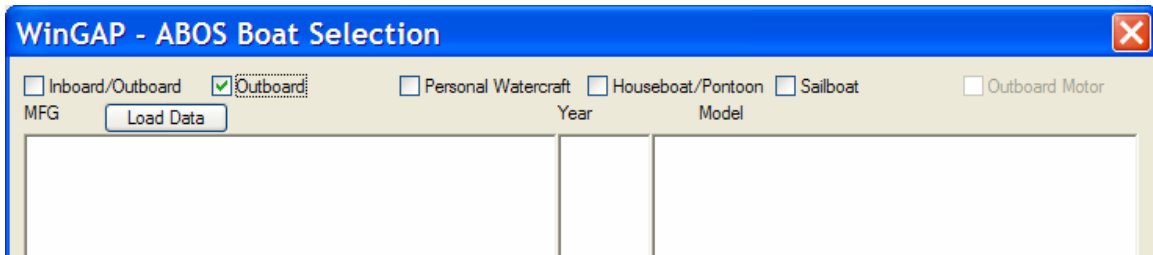

If a boat or motor is being added, the two buttons will not be enabled until the New button is clicked.

To initiate the process of valuing a boat or motor with the ABOS Pricing Guide values, click the ABOS button that relates to the marine item you are seeking a value for. If the ABOS – Boat button is clicked, the ABOS Boat Selection screen will appear as follows.

The screenshot shows the 'WinGAP - ABOS Boat Selection' window. At the top, there are several checkboxes: 'Inboard/Outboard', 'Outboard', 'Personal Watercraft', 'Houseboat/Pontoon', 'Sailboat', and 'Outboard Motor'. Below these are fields for 'MFG', 'Year', and 'Model'. A 'Load Data' button is next to 'MFG'. The main area is a large empty table. At the bottom, there are sections for 'Value' (with radio buttons for SRP, Low, High, Retail and input fields), 'Condition' (with a dropdown menu set to 'Good-Average' and an input field for 'Condition Adj' set to '0.00'), 'Hull Type', 'Feet / Inch', 'Horse Power', and 'Boat Trailer Value' (set to '0'). There are 'Cancel' and 'Select' buttons at the bottom right.

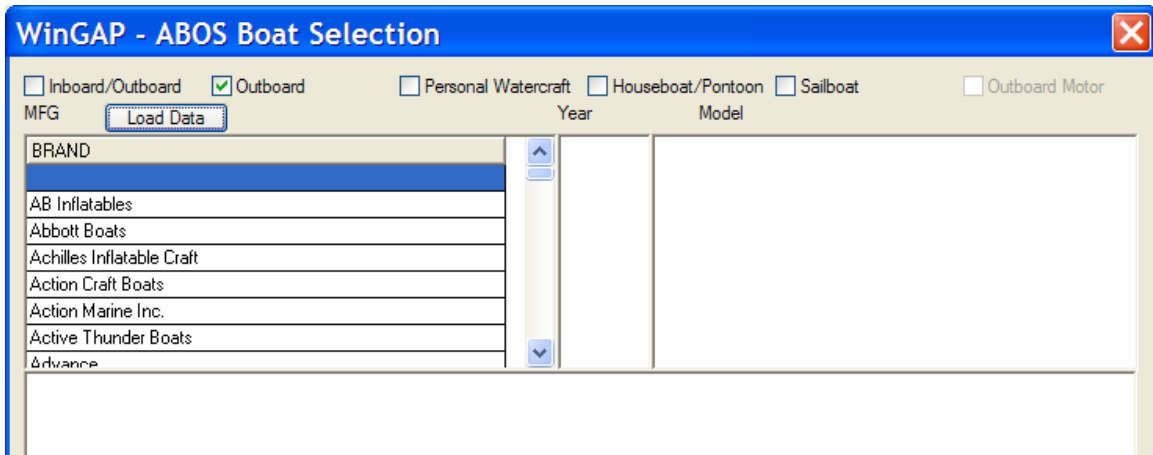

WinGAP ABOS Module

The user should now place a checkmark to the left of the boat type or click Cancel to return to the boat screen. When a boat type is selected, the Load Data button will be enabled as show below.

The screenshot shows the 'WinGAP - ABOS Boat Selection' dialog box. At the top, there are several radio button options: 'Inboard/Outboard', 'Outboard' (which is checked), 'Personal Watercraft', 'Houseboat/Pontoon', 'Sailboat', and 'Outboard Motor'. Below these options is a 'Load Data' button. The main area of the dialog is divided into three columns: 'MFG', 'Year', and 'Model', which are currently empty.

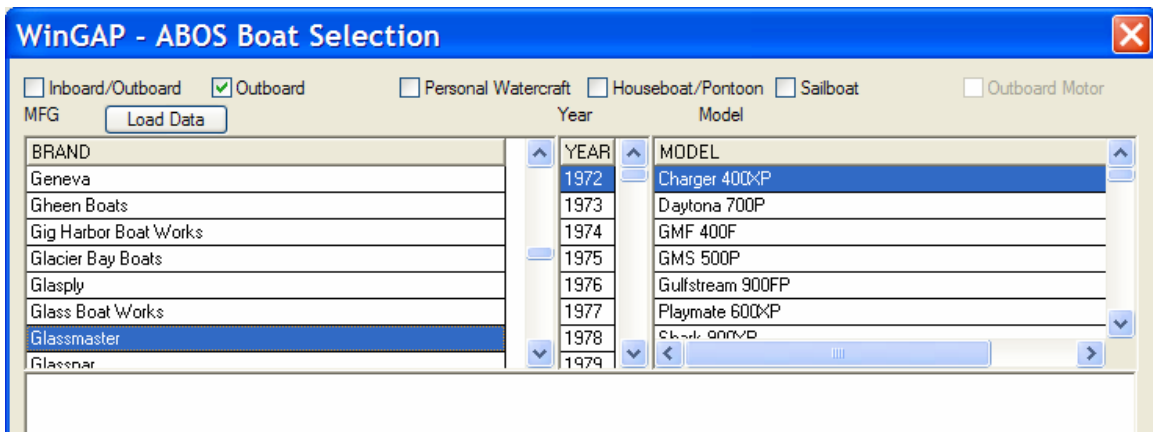

To proceed with the selection process, the user should click the Load Data button. When the button is clicked, the screen below will appear which will provide the user with a means of selecting the Brand/Mfg of the boat. The items listed in the Brand column are all outboard boat manufactures found in the ABOS Pricing Guide.

The screenshot shows the 'WinGAP - ABOS Boat Selection' dialog box after the 'Load Data' button has been clicked. The 'MFG' column now contains a list of boat brands. The 'YEAR' and 'MODEL' columns remain empty.

BRAND	YEAR	MODEL
AB Inflatables		
Abbott Boats		
Achilles Inflatable Craft		
Action Craft Boats		
Action Marine Inc.		
Active Thunder Boats		
Advance		

The list provides incremental search functionality which means that the user can click on the first item in the list and begin typing the manufacturer's brand name. If the boat manufacturer was Glassmaster, the letters g-l-a-s-s-m could be typed and the user would be taken to the Glassmaster brand as shown below.

The screenshot shows the 'WinGAP - ABOS Boat Selection' dialog box with the 'Glassmaster' brand selected in the 'MFG' column. The 'YEAR' and 'MODEL' columns are also populated with data.

BRAND	YEAR	MODEL
Geneva	1972	Charger 400XP
Gheen Boats	1973	Daytona 700P
Gig Harbor Boat Works	1974	GMF 400F
Glacier Bay Boats	1975	GMS 500P
Glasply	1976	Gulfstream 900FP
Glass Boat Works	1977	Playmate 600XP
Glassmaster	1978	CL... ON...P
Glassmar	1979	

WinGAP ABOS Module

The vertical scroll bar to the right of the Brand list is another means of access the manufacturer. If the vertical scroll bar is used, when the desired Brand appears, the user would select the Brand by clicking on it.

When the Brand is selected the Year and Model columns are populated with the items that are available for the selected Brand. The user should **FIRST** select the Year followed by the selection of the Model using the same techniques as discussed for the Brand selection.

When all three selection processes (Brand, Year & Model) have been completed, the ABOS Boat Selection will appear as shown below with the fourth list box containing the items available for selection based on the Brand/Year/Model.

If a motor is to be valued, the same process as described above should be followed with the only difference being the clicking of the ABOS – Motor button at the beginning.
