Advantage Client Kits

Advantage clients allow database applications native access to the Advantage Database Server and Advantage Local Server. Advantage clients are available for a variety of development platforms. Advantage clients are available electronically free of charge. Orders for hardcopy media will receive a CD-ROM containing all available Advantage clients and will be charged \$50.00.

<i>Model Number</i>	<i>Description</i>	<i>Price</i>
8810A	Advantage Product CD <ul style="list-style-type: none"> • Advantage Client Engine API • Advantage TDataSet Descendant for Delphi/C++Builder/Kylix • Advantage .NET Data Provider • Advantage JDBC Driver • Advantage OLE DB Provider • Advantage ODBC Driver • Advantage CA-Visual Objects RDDs • Advantage CA-Clipper RDDs • Advantage DBI Driver • Advantage PHP Extension • Advantage Crystal Reports Driver • Advantage Data Architect 	\$50.00 *

* Charge is for hardcopy media only. Also available via download free of charge from the Advantage Web site at: www.AdvantageDatabase.com.

Advantage Internet Connector

The Advantage Internet Connector is a license that allows an unlimited number of Internet users access to a single copy of the Advantage Database Server software (the small business edition is limited to 10 concurrent connections). An Internet user is any person using an application that interacts with a Web server or middleware software product via an Internet connection to gain access to data from an Advantage Database Server. The Web server or middleware must be a product that physically interacts with the data on behalf of the remote Internet user, rather than just a router or VPN-like product that simply routes the data between the remote client machine and the Advantage Database Server. You must purchase an Advantage Internet Connector license for each server that is running the Advantage Database Server and is being accessed by an Internet user.

<i>Model Number</i>	<i>Description</i>	<i>Price</i>
8710B	Advantage Internet Connector (small business edition)	\$299.00
8710C	Advantage Internet Connector	\$2620.00

Advantage Database Server

for Linux, NetWare and Windows NT/2000/2003

The Advantage Database Server for Linux runs on Linux distributions using glibc version 2.1.2-11 and newer in conjunction with a kernel of version 2.2 or newer. Advantage Database Server for NetWare runs on a NetWare 4.x, 5.x or 6.x file server. Advantage Database Server for Windows NT/2000/2003 runs on Microsoft Windows NT 4.0, Microsoft Windows 2000, or Microsoft Windows Server 2003. Advantage Database Server is available in various user options indicating the maximum number of simultaneous connected workstations running one or more Advantage applications accessing the Advantage Database Server. The server is also available for 60-day evaluation (model number 8740D-EVL, 8710X-EVL and 8720D-EVL) where the server has no limitations with the exception of the 60-day trial period. (Advantage Database Server for Linux, Advantage Database Server for NetWare and the Advantage Database Server for Windows NT/2000/2003 are sold separately).

<i>Model Number for Linux</i>	<i>Model Number for NetWare</i>	<i>Model Number for Windows NT/2000/2003</i>	<i>Description</i>	<i>Price</i>

Advantage Database Server Upgrade Price List

for NetWare, Windows NT/2000/2003 and Linux

The number of licensed users and the current licensed version of the server determine the upgrade price when upgrading the Advantage Database Server for NetWare, Windows NT/2000/2003 and Linux. The pricing below reflects the cost when moving from one version to the next for each of the user counts available. For example, when upgrading a 5 user from 7.x to 8.x the cost is \$165. To upgrade a 5 user from 6.x to 8.x, the cost is \$330. Customers who own version 5.x or older of ADS must purchase a new server license when upgrading. When purchasing an upgrade, please supply the following: current OS version, current serial number, current validation code, and current user option.

<i>NetWare</i>	<i>Windows NT/2000/2003</i>	<i>Linux</i>	<i>Description</i>	<i>Price</i>

Advantage Database Server Cross-Grade Pricing

for Linux, NetWare and Windows NT/2000/2003

Customers who currently own the Advantage Database Server for one operating system can convert their server to an Advantage Database Server for a different operating system. For example, the Advantage Database Server for NetWare may also be converted to an Advantage Database Server for Windows NT/2000/2003 or Advantage Database Server for Linux. The Cross-Grade price is determined by the same User Option as their current Advantage Database Server for Linux, NetWare or Windows NT/2000/2003. Please supply the following information at the time of order: current serial number, current validation code, current user option and the operating system you will be cross-grading to. Cross-Grades can only occur at the same version level. The prices below do not include expansions or upgrades.

<i>NetWare</i>	<i>Windows NT/2000/ 2003</i>	<i>Linux</i>	<i>Description</i>	<i>Price</i>
