KBB Survey

- Is the KBB automobile module in wingap used enough to justify the annual \$5,000 (\$34 / County / Year) cost?

Yes	9
No	53

- KBB has changed their method of data access – the Executive board will, with your input and thoughts (so if you have more – share them with someone), decide if the additional programming required to adjust to the new data format will be worth the benefit.

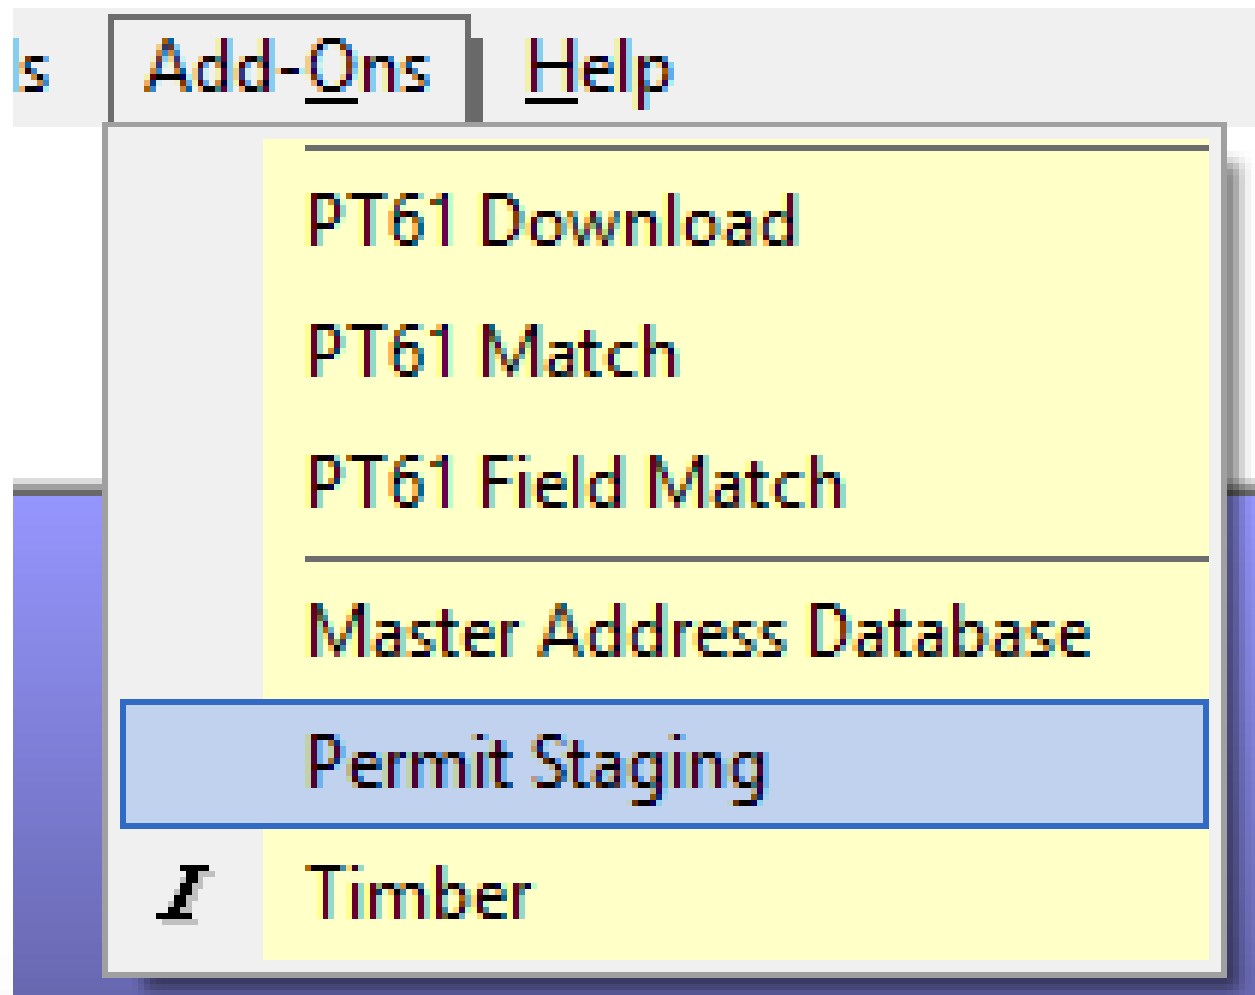

RapidSketch / qPublic

- qPublic is having trouble reading the data layout changes required for RapidSketch.
- Result is some parcels sketches do not appear on the website.
- Solution at this point is for Wingap to bulk export your sketches to JPGs on your system and qPublic will download them.
- Contact me via email if you want me to perform this task for you.
 - Requires a Teamviewer install on any client with unattended access
 - OLS can help you with TV if you don't already have one setup – many of you do. However – many have also change / upgraded TV and your TV-ID number may have changed – send it to me again please.
 - Email needs to include TeamViewer ID and passcode.

GRATIS / DRIVES / Street Files

- If you are still needing my assistance with creating a STARTING point for you and your tax commissioner.
- EMAIL ME
- REMIND ME each week
- What is this street data for anyway?
- **End Game is the citizen can purchase a car and give the dealer their street address and the DRIVES software will use that street address to make sure TAVT goes to the correct tax district.**

Permit Staging

Permit Staging

- Works like PT61
- Top of screen is raw permit data from permit department
- Bottom of screen is WinGAP item you want permit imported into

The screenshot shows the WinGAP - Permit Staging Area (DEVEL) Richmond2019 application. The interface is divided into two main sections. The top section displays a list of permit data with columns for Recid, Permkey, realkey, Parcel_no, Legal_desc, and Jobaddress. The bottom section shows a summary table with columns for Propotype, Pkey, and Parcel_No, and an IMPORT button.
